3. This application is in condition for allowance except for the presence of claims 51-64 non-elected without traverse. Accordingly, claims 51-64 have been cancelled.

4. The application has been amended as follows:

In the claims:

Cancel claims 51-64.

In the specification:

Allowable Subject Matter

5. Claims 33-50 are allowed.
6. The following is an examiner's statement of reasons for allowance: the prior of record fails to disclose the combination of a method for operating a memory device recited in the base claim(s), including the combination of the structure comprising: the nonvolatile memory element is connected to a bit line comprised of first and second bit lines passing across the gate, wherein an addressing voltage and a write voltage are applied to the gate and the bit line, respectively, to write data to the nonvolatile memory element (claim 33); a nonvolatile memory element formed between the gate and the substrate, and a metal line parallel to a word line connected to the transistor, wherein data is written by changing the conductivity of the nonvolatile memory element when the metal line is grounded (claim 40).
